TS822

2.5V micropower shunt voltage reference

Features

- 2.50V typical output voltage
- Ultra low current consumption: 40µA typ.
- High precision @ 25°C
  - ±2% (standard version)
  - ±1% (A grade)
- High stability when used with capacitive loads
- Industrial temperature range: -40°C to +85°C
- 100ppm/°C maximum temperature coefficient

Applications

- Computers
- Instrumentation
- Battery chargers
- Switch mode power supply
- Battery operated equipment

Description

The TS822 is a low power shunt voltage reference providing a stable 2.5V output voltage over the industrial temperature range (-40°C to +85°C). Availabe in SOT23-3 surface mount package, it can be designed in applications where space saving is critical.

The low operating current is a key advantage for power restricted designs. In addition, the TS822 is very stable and can be used in a broad range of application conditions.

1 Absolute maximum ratings and operating conditions

Table 1. Absolute maximum ratings

Symbol	Parameter	Value	Unit
I_k	Reverse breakdown current	20	mA
I_f	Forward current	10	mA
P_d	Power dissipation (1)SOT23-3	360	mW
T_{stg}	Storage temperature	-65 to +150	°C
ESD	Human body model (HBM)(2)	2	kV
	Machine model (MM)(3)	200	V
T_{lead}	Lead temperature (soldering, 10 seconds)	260	°C

1. P_d is calculated with T_{amb} = 25°C and R_{thja} = 340°C/W for the SOT23-3L package
2. Human body model: 100pF discharged through a 1.5kΩ resistor between two pins of the device, done for all couples of pin combinations with other pins floating.
3. Machine model: a 200pF cap is charged to the specified voltage, then discharged directly between two pins of the device with no external series resistor (internal resistor < 5Ω), done for all couples of pin combinations with other pins floating.

Table 2. Operating conditions

Symbol	Parameter	Value	Unit
$I_{k\text{-}min}$	Minimum operating current	50	µA
$I_{k\text{-}max}$	Maximum operating current	15	mA
T_{oper}	Operating free air temperature range	-40 to +85	°C

3 Package information

In order to meet environmental requirements, STMicroelectronics offers these devices in ECOPACK® packages. These packages have a lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an STMicroelectronics trademark. ECOPACK specifications are available at: www.st.com.
